

SPARE PARTS SUPPLIER - POWER TRANSMISSION
ENGINEERING SOLUTIONS

TECHNICAL SOLUTIONS PROVIDER

DESIGN OFFICE: regular machine maintenance and design office

To meet your most intricate technical development requirements in a wide range of sectors, TPM9001 has an in-house design office. Our technicians develop a wide range of parts to produce whatever machine you need.

- **SERVICES OFFERED:**

The design office defines your needs, draws up plans, carries out a feasibility study, produces the parts or machines, and installs the equipment.

- **FACILITIES:**

The mechanical design work is done using computers (CAD).

The in-house mechanics workshop handles assembly of the equipment and the test phase.

- **EXPERIENCE:**

Ever since 1995, our mechanical and electromechanical engineering office has offered clients a wide range of solutions, paying particular attention at every stage of the process to standards and manufacturing techniques, without ever losing sight of the feasibility of the product and the ergonomic features of the equipment that we create.

Although we started out specialising in developing machines and parts integrating bottling lines, over the years we have diversified and now design equipment for a wide range of industries.

Services offered:

- Customised solutions for your production line problems
- Improvements for workstations and/or tools
- Modification and modernisation of existing facilities
- "Customer-specific" machines
- CAD using Autocad Inventor

Just a few examples of what our design office has produced (this list is by no means exhaustive):

Valve-opener and tightening device

To meet the request of an international gas producer, we designed a hook which lets you fasten gas bottles when they are being transported: the **BEST HOOK**® and the **HOOK ME**® .

Bottle-rinser

Accumulation table

Automatic valve-opener
